

## **RACE Joins Connecticut Maritime Coalition**

*Stratford, CT (November 8, 2018)* - RACE Coastal Engineering, a waterfront structural, geotechnical and regulatory consultation and design firm, is honored to join the State's maritime industry advocate Connecticut Maritime Coalition (CMC). Representing commercial organizations, CMC develops strategies to strengthen the maritime economy.

The CMC comprises 23 member businesses that share market knowledge and expertise and work together with government, businesses and private organizations to solve issues and grow the State's economy.

Maritime activities have always been a significant part of Connecticut's economy. The maritime industry in Connecticut employs more than 12,000 and generates revenues in excess of \$2.6 billion annually.

The maritime industry is linked to a wide range of other economic activities and impacts every citizen of the state. The direct impacts range from employment and job creation to transportation to local, state and federal taxes, while indirect impacts range from cost of goods to quality of life.

"We're excited to be part of the revitalization of Connecticut's waterfront cities and towns for our citizens and visitors, as well as for our transportation needs," said Devin Santa, President of RACE Coastal Engineering. "I-95 continues to get more congested - our deep water ports can alleviate our highways and create jobs. This is important to not only CT but the entire Northeast."

**About RACE:** Founded in 1999, RACE Coastal Engineering provides coastal, structural, geotechnical and regulatory consultation and design to residents, recreational facilities, municipalities and commercial properties throughout the Northeast and beyond. To learn more about RACE, call 203-377-0663 or visit <https://www.racecoastal.com/>.

***RACE was nationally recognized by the American Council of Engineering Companies (ACEC) for its innovative approach to the Steelpointe Harbor Waterfront Project in Bridgeport, CT***
